PH ARVIND SHARMA

DATA SCIENTIST | MACHINE LEARNING | AI

SUMMARY

Data Scientist with hands-on experience in data analysis, exploratory data analysis, machine learning, deep learning, NLP, computer vision, and time series forecasting. Skilled in developing end-to-end data science solutions including data preprocessing, feature engineering, model development, optimization, evaluation, and deployment using Python, SQL, Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, and Streamlit.

SKILLS

• Programming: Python, SQL

• Machine Learning & AI: Scikit-learn, XGBoost, TensorFlow, PyTorch, Computer Vision, Deep Learning, NLP, Time Series Forecasting (ARIMA, SARIMA, LSTM), Generative AI, LLMs, AI Agents, Multimodal AI, RAG, Prompt Engineering

• Frameworks & Libraries: LangChain, Hugging Face, Streamlit, FastAPI, Flask, OpenCV, YOLOv8, YOLOv10, Whisper

• Databases & Vector Stores: PostgreSQL, MySQL, Qdrant, FAISS

• Cloud & Tools: Microsoft Azure, Docker, Git, GitHub, PyCharm, Jupyter Notebook, VS Code

• Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Power BI, Tableau

WORK EXPERIENCE

Machine Learning Intern (AI/ML)

Oct 2025 – Apr 2026

InLighnX Global Pvt. Ltd.

• Executed end-to-end data science and machine learning workflows, including EDA, data preprocessing, feature engineering, model optimization, evaluation, and Streamlit deployment.

• Developed sales and energy forecasting models using ARIMA, SARIMA, and LSTM, achieving 90–95% prediction accuracy.

• Developed machine learning solutions for heart disease prediction, stock and Bitcoin forecasting, and fake news classification.

• Built a CNN-based Traffic Sign Recognition model on the GTSRB dataset containing 50K+ images across 43 classes, achieving 95% accuracy.

• Designed a CNN-based Pneumonia Detection model using chest X-ray images, achieving 92–95% diagnostic accuracy.

• Engineered ANAKIN, a multimodal AI assistant integrating LLMs, STT, TTS, OpenCV, and Groq API for real-time voice interaction and task automation.

Machine Learning Intern

May 2024 – June 2024

Innodatatics

Text Emotion Analysis using LLM

• Architected an LLM-based emotion classification system supporting 16 emotion categories with grammar scoring and filler-word detection, achieving BLEU 45.12 and ROUGE-L 67.35.

• Developed a Streamlit and PostgreSQL application, reducing manual review by 50% and improving team efficiency by 20%.

Bird Detection & Tracking (YOLOv8x)

Aug 2023 – Sept 2023

• Trained a YOLOv8x-based bird detection and age classification model on 4,981 images, achieving 0.96 Precision, Recall, and F1-score and 0.95 mAP@0.5.

• Implemented a real-time tracking system using OpenCV and Flask, improving operational efficiency by 20% and reducing workload by 15%.

Technical Support Consultant

Sept 2021 – Sept 2023

Anjaneya Tech Software Solution

• Provided end-to-end technical support for client applications, troubleshooting software issues, ensuring high system availability, and maintaining support documentation.

• Communicated technical solutions to non-technical users, resolving issues efficiently while completing system handovers and clearance procedures.

FEATURED PROJECT

RecruitAI – End-to-End AI Hiring Assistant

Jul 2026

• Developed RecruitAI, an end-to-end AI hiring platform integrating LLMs, Multi-Agent AI, Speech AI, Computer Vision, and Vector Search (Qdrant) to automate recruitment workflows.

• Built AI-powered resume screening, semantic candidate search, voice interviews, AI proctoring, and automated interview reports using FastAPI, Streamlit, Groq Llama, Whisper, OpenCV, and YOLOv10.

• Designed a Multi-Agent AI architecture for resume evaluation, candidate search, interview assessment, HR recommendations, and hiring decisions.

EDUCATION

Bachelor of Engineering (Mechanical)

New Horizon College of Engineering, VTU

Aug 2014– Jun 2021

CERTIFICATIONS

• Google AI Professional Certificate – Jul 2026

• Data Science Certification (NASSCOM) – Oct 2023
